

NATIONAL SHIP CHANDLERS
SOUTH AFRICA

INTEGRATED MANAGEMENT SYSTEM SAFETY HEALTH ENVIRONMENTAL & QUALITY POLICY

As the largest Ship Supplier in South Africa, National Ship Changers' experience has led to the understanding that every client, and/or every kind of vessel, has their own specific needs. That is why we have developed specialized divisions that are designed to cater for these individual requirements under one holistic and cohesive offering. Essentially, we continue to supply ships in all of South Africa's ports of call with everything from provisions to technical, deck & engine to cabin, and bonded stores. We tailor solutions to provide you with the best quality and service available within your niche.

National Ship Changers management recognizes that its operations, products, activities and services are subject to, and may, generate non-financial risk exposure to its assets, employees, community, environment and product integrity. In order to give effect to the duty to manage non-financial risk exposures, NSC Management developed and implemented an integrated management system based on international standards, best practices and customer requirements to manage, product & service quality, occupational health, safety and environmental risk exposures.

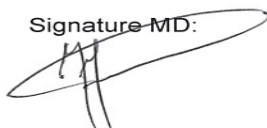

This IMS is not only based on the requirement to demonstrate compliance but also on the belief that the sustainability and continuity of our business will be enhanced through the application of improved management systems, a higher level of internal competency and the desire to continually improve on the IMS.

National Ship Changers Management is committed to:

- Understanding our clients current and future needs, meet the contract requirements and strive to exceed customer expectations.
- Provide leadership and establish vision, direction and shared values.
- Design, develop, document, implement and maintain IMS based on legal and adopted other requirements, as well as adopted arrangements.
- Constantly meet applicable legal and other requirements, as well as National Ship Changers arrangements as a minimum level of performance.
- Consistently design, develop and improve our activities, products and services
- Consistently manage all processes to actively eliminate, prevent or reduce potential risk exposures posed by our own staff, contractors, suppliers and other service providers, through the procurement, storage and distribution of goods.
- Prevention of injury and ill health of employees and contractors and continually improve OHS performance.
- Prevention of pollution and environmental degradation
- Provide and effectively manage resources and service activities to ensure that our desired results are achieved.
- Create sustainable and mutually beneficial supplier and community relationships in line with the corporate social development principles.
- Continual improvement of the suitability, adequacy and effectiveness of the IMS through the setting of objectives, targets and programs and through the review of performance monitoring and analysis of data.

In order to ensure that this policy is implemented, maintained and continually improved, National Ship Changers will ensure:

- That this policy is effectively communicated and fully understood by all employees and contractors;
- That this policy is made available to the customers/ clients upon request; and
- That this policy is regularly reviewed for continual suitability, adequacy and effectiveness.
